

Topic	Question	Answer
1. What is the main purpose of the study?	1. To investigate the effect of the intervention on the outcome.	1. To investigate the effect of the intervention on the outcome.
	2. To determine the feasibility of the intervention.	2. To determine the feasibility of the intervention.
2. What are the objectives of the study?	1. To evaluate the effectiveness of the intervention.	1. To evaluate the effectiveness of the intervention.
	2. To assess the acceptability of the intervention.	2. To assess the acceptability of the intervention.
3. What are the research questions?	1. What is the effect of the intervention on the outcome?	1. What is the effect of the intervention on the outcome?
	2. What are the barriers to the implementation of the intervention?	2. What are the barriers to the implementation of the intervention?
4. What are the hypotheses?	1. The intervention will have a positive effect on the outcome.	1. The intervention will have a positive effect on the outcome.
	2. The intervention will be acceptable to the participants.	2. The intervention will be acceptable to the participants.
5. What are the study design and methods?	1. The study is a randomized controlled trial.	1. The study is a randomized controlled trial.
	2. The study is a feasibility study.	2. The study is a feasibility study.
6. What are the results?	1. The intervention had a positive effect on the outcome.	1. The intervention had a positive effect on the outcome.
	2. The intervention was acceptable to the participants.	2. The intervention was acceptable to the participants.
7. What are the conclusions?	1. The intervention is effective and acceptable.	1. The intervention is effective and acceptable.
	2. The intervention should be implemented on a larger scale.	2. The intervention should be implemented on a larger scale.
